

Toddler TEEM Training

The Toddler TEEM Teacher Training, for teachers of older two and three year olds, is based on the most recent scientific research and meets the needs of adult learners. Teachers and directors come to this interactive training which provides fun, hands-on activities and ideas for teachers to immediately take back and implement in their classrooms. Participants see and discuss video segments of teachers and children in actual classrooms. The training is centered around the Toddler TEEM Positive Beginnings* kit (required for training) to help teachers utilize the kit in the most appropriate and effective manner and is usually provided on a Saturday to accommodate childcare personnel.

Toddler TEEM Training has these key components:

- **Classroom Arrangement**
- **Language**
- **Emotional Growth**
- **Maintaining Children's Interest**
- **Read Aloud**
- **Using Themes in a Childcare Setting**
